WORK EXPERIENCE

ODeX GLOBAL - Backend Developer Intern, Dubai, UAE

Jan 2024 - July 2024

- Developed and tested 5 REST APIs using Spring WebFlux to support audit and payment modules deployed to the ODeX platform.
- Designed and implemented parsers to extract JSON data from XML and PDF bank transaction documents, enabling automated processing of payment records.
- Integrated PostgreSQL and MongoDB for efficient retrieval and management of structured and document-based data.

ABU DHABI UNIVERSITY - IT intern, Abu Dhabi, UAE

Feb 2025 - May 2025

- Provided on-site technical support by diagnosing and resolving hardware, software, and connectivity issues in classrooms and office environments.
- Logged and managed service requests through the IT helpdesk system to track issue resolution.
- Assisted in the testing of internal web applications to ensure functionality and reliability.

EDUCATION

BOSTON UNIVERSITY

Sept 2025 - Present

Masters in Computer Science | GPA: 3.95/4.0

Relevant Coursework: Grad. Algorithms, Object Oriented Software Design and Principles, Agile App Development, Data Systems, Architecture, Applied Machine Learning

BITS PILANI, Dubai, UAE

Sept 2020 - Sept 2024

Bachelors in Computer Science with Distinction | CGPA: 9.06/10.0

Relevant Coursework: Machine Learning, AI, DBMS, Object Oriented Programming, Data Structures and Algorithms

PROJECTS

Study Buddy - Full Stack App

Feb 2026 - Apr 2026

- Built a full-stack student collaboration platform using React (frontend) and C# (backend) to enable discovery of study spaces, group formation, and tutor matching.
- Integrated Firebase Authentication, Supabase, Stream API, Google Maps API, and Stripe to enable secure authentication, real-time messaging, geolocation-based study space discovery, and end-to-end tutor session payment processing with server-side validation.

Analyzing Zone Size in ZNS SSDs

Feb 2026 - Apr 2026

- Conducted device-level and application-level benchmarking of Zoned Namespace (ZNS) SSDs using FIO and RocksDB.
- Evaluated the impact of zone size and zoned storage parallelism strategies (intra-zone vs inter-zone) on throughput, latency, write amplification, and storage efficiency using the ConfZNS++ emulator.

SKILLS

Programming Languages: Python, Java, C++, C#, React

Frameworks & Libraries: Spring WebFlux, jOOQ

Databases: PostgreSQL, MongoDB, MySQL, Supabase, Firebase

Tools & Technologies: Git, Linux, FIO, RocksDB, ConfZNS++, Unity, Figma
